Sterilization Solutions

symmetry surgical™

formerly Codman instruments and SSI

FlashPak

FlashPak

The FlashPak is a hospital-proven, closed-container system engineered for safe transport of immediate-use steam sterilized (flashed) instruments in a mobile, sterile field. Advanced plastic polymer construction provides long term durability.

KEY BENEFITS:

- Validated and FDA cleared for use in both gravity and pre-vacuum cycles
- Accepts standard wire basket and a wide variety of trays to accommodate many types of instruments
- Transparent lid for quick identification
- Constructed of high-performance engineering polymers

FlashPak Units (Includes Base, Lid & Basket)

Quad-Lock Sterilization Container

How to Choose the Right Quad-Lock Container

1. Locate the instruments that will go inside the container and determine, based on the number, size and weight of instruments, what size basket is needed to hold these instruments.

> **NOTE:** No instruments should sit above the inner edge of the basket.

2. Determine whether a **Solid Bottom Container Base** or **Filter Bottom Container Base** is appropriate based on the sterilization systems in use at your facility.

> **NOTE:** To determine the height of the container base, add the height of the basket, plus 1 inch (25 mm) for the **Wire Base** (if used), plus 2 inches (50 mm) of clearance.
>
> A wire base must be used with a **Filter Bottom Container Base**.
>
> **Filter Bottom Container Base** Example:
> 2 inch (50 mm) Basket + 1 inch (25 mm) Wire Base + 2 inches (50 mm) clearance = 5 inches (127 mm).
>
> **Solid Bottom Container Base** Example:
> 2 inch (50 mm) Basket + 2 inches (50 mm) clearance = 4 inches (101 mm).

3. Select a **Wire Base** the same length as the basket when using a Filter Base.

4. Consider a **Protective Mat** the same length as your basket, or upgrade to Accessory Instrument Organizers appropriate for your specific instrument set.

5. Add a **Filter Lid** in the color you prefer for each instrument set. Filter Lids are available in Gray, Yellow, Green, Blue, Red and Black.

6. Consider a **Security Lid** in the color you prefer for each instrument set. Security Lids are available in Gray, Yellow, Green, Blue, Red and Black.

> See Product Information For Use for further details.

7. Consider **Ergonomic Hand Grips** in the color you prefer for each instrument set. Ergonomic Hand Grips are available in Gray, Yellow, Green, Blue, Red and Black.

8. Consider **Aluminum Nameplates** in the color you prefer for each instrument set. Aluminum Nameplates are available in Gray, Yellow, Green, Blue, Red and Black. Make note of what should be etched on each Aluminum Nameplate, up to a 45 character limit.

Don't Forget:

- Quad-Lock Single-Use Filters
- Quad-Lock Single-Use Paper Label with Indicator
- Quad-Lock Single-Use Security Seals

- Designed to prevent instruments, silicone mats and baskets from touching the bottom of the container. Wire base required for proper air displacement and sterilant penetration when using filtered container base
- A Wire Base must be used with every Container Base that has filters on the bottom

- Helps protect the most delicate instruments
- Pair a Protective Silicone Pin Mat with a Wire Base or Basket and you can place large objects directly in the Container Base without using a Basket
- Only available in blue

Ultra Container System

C18135

Ultra Container System

The lightweight Ultra Container System helps keep heavy instrument sets within AORN and AAMI limits. Designed for durability, it weighs 30% less than comparable sterilization systems.

KEY BENEFITS:

- Extruded rails reinforce the base and lid rims
- 13 inch (330 mm) width provides acceptable packaging for most loaner instrumentation trays
- Five sizes accommodate both general and specialty instruments

Prevac Base & Lid

DentalPak

DentalPak

The multifunctional Instrument Cassettes accommodate a wide array of delicate instruments.

KEY BENEFITS:

- Unique hinged lid design provides easy use
- Silicone strips can accommodate instruments with diameters ranging from 2.5 to 8.0 mm
- Silicone mats gently secure instruments
- Unique raised silicone (latex free) mats provide efficient ventilation to facilitate drying
- Economical, durable and functional

Quick Kit

Quick Kit

The Quick Kit provides customized case solutions in a reduced timeframe. Quick Kits are ideally suited for use with large instruments: trauma, spinal or orthopedic.

Over 25 silicone and Radel® R brackets accommodate a wide variety of instruments.

KEY BENEFITS:

- Each bracket packaged with track and screws for easy assembly
- Unique hole pattern allows brackets to be placed at different angles in 45° increments
- Replacement tracks also available

Metal Level Assemblies

ScopePak

ScopePak Benefits

The ScopePak offers engineered protection for the handling and storage of costly endoscopes. Available in a variety of sizes to fit a broad range of endoscopes, each tray features silicone holding bars to secure the endoscope in place, and a transparent lid for easy identification.

KEY BENEFITS:

- Endoscopes are fixed in place with unique silicone holding bars
- ScopePak is compatible with steam and ETO sterilization
- Transparent lid allows for easy instrument identification

StackPak

StackPak

StackPak is a revolutionary new way to handle, transport, organize and sterilize delicate surgical instrumentation. The unique latch design creates a simple way to combine complex instrument sets into one neat package.

KEY BENEFITS:

- Fully modular system is compatible with all existing MultiPak accessories
- Add additional trays if the set expands
- Only ONE lid needed to cover the entire system
- New latch design allows you to stack trays while keeping them secure

STERILIZATION

StackPak Trays

TransPak

8600

TransPak

The TransPak was engineered to protect personnel from the hazards of contaminated instruments after surgical use. This strong, lightweight plastic soaking system is designed for minimized spillage and splashing, helping to protect hands and eyes from possible infection during transport to cleaning facilities. The TransPak meets AORN and ANSI/AAMI standards for proper transport of contaminated surgical instruments.

The removable insert tray permits the safe transfer of contaminated instruments with no hand contact; the TransPak itself can be transferred directly to a washer/decontaminator.

KEY BENEFITS:

- Minimized spillage and splashing protects personnel
- Engineered to withstand the rigors of repeat use
- Removable insert tray designed to accept MultiPak and many other instrument trays

TransPak Base, Lid & Insert
